

Sachintha Prabashana

FULL STACK DEVELOPER | SOFTWARE ENGINEER

Matara, Sri Lanka | +94 762717290 | prabashana.se@gmail.com | Portfolio: prabashana.me/
GitHub: github.com/sachintha-prabashana | LinkedIn: linkedin.com/in/sachintha-prabashana/

PROFILE SUMMARY

Software developer with 1+ year of hands-on experience in Java and JavaScript-based development, with backend experience using Spring Boot, Express.js, and NestJS, and frontend experience with React.js. Also have exposure to Linux environments and Google Cloud Platform (GCP), with a strong interest in continuously learning and working with new technologies.

Also brings 6 months of industry experience with Express.js and React Native in collaborative team environments following professional software development practices.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend Development: Spring Boot, Node.js, Express.js, NestJS, FastAPI, Microservices Architecture, RESTful APIs

Frontend & Mobile Development: React.js, Next.js, React Native, Expo, HTML, CSS, Tailwind CSS

Machine Learning & Data: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Model Deployment

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Cloud & DevOps: CI/CD (GitHub Actions), Docker, Google Cloud Platform (GCP), Linux, Vercel

Tools & Agile Collaboration: Git, GitHub, GitHub Projects, Jira, Postman

PROFESSIONAL EXPERIENCE

Full Stack Developer (Part-time)

Jul 2026 - Present

Ceyoon | Sri Lanka

- Contributed to the full-stack development of 2 production web applications using React.js, NestJS, and Express.js, designing modular backend architecture, database schemas, and responsive user interfaces.
- Achieved 100% on-time milestone delivery across 6 consecutive two-week sprints, executing Jira user stories with structured Git workflows to maintain clean, peer-reviewed pull requests.

Full Stack Developer Intern

Apr 2026 - Sep 2026

Intelleon (Pvt) Ltd | Sri Lanka

- Contributed to technical design by breaking down user stories into modular architectures, designing PostgreSQL schemas and Mermaid workflows, and authoring module-level Swagger/OpenAPI specs to implement 25+ production endpoints in Node.js.
- Developed cross-platform mobile features using React Native and managed application build pipelines, executing tasks within 1-week Agile sprints and GitHub Projects to ensure stable, on-schedule releases.

Technical Writer

Apr 2026 - Present

Medium

- Authored technical articles on WSO2 API Manager and Asgardeo, explaining API security, OAuth 2.0/OIDC, and modern customer identity and access management concepts for developer and technical audiences.

PROJECTS

FitBuddy – Cloud-Native Microservices Platform

Java, Spring Boot, Spring Cloud, PostgreSQL, MongoDB, Google Cloud Platform

- Developed a distributed **Spring Boot microservices backend** with Eureka service discovery, centralized configuration, and API Gateway routing.
- Integrated **PostgreSQL, MongoDB, and Google Cloud Storage** to support data persistence and cloud-based file storage.
- Deployed backend services on **Google Cloud Platform (GCP)** by building executable JAR files with Maven and configuring cloud-based service execution.
- Repositories: [Platform Infrastructure Repo](#) | [Core Services Repo](#)

Credit Risk - Loan Risk Assessment Platform

Python (FastAPI), Spring Boot, React.js, MySQL, Docker, AWS EC2, Vercel

- Developed an ML-based **loan risk assessment system** using Python and FastAPI to predict loan approval risk based on applicant data.
- Developed the **Spring Boot backend** with MySQL for business logic and data persistence, and built a **React.js + TypeScript frontend** for submitting applications and displaying prediction results.
- Containerized backend services with **Docker** and deployed the application using **AWS EC2 and Vercel**, with CI/CD integration.
- Repository: [GitHub Repository](#)

Finsight – Financial Management & Analytics Platform

Node.js, TypeScript, React Native, FCM v1, EAS, Swagger/OpenAPI, Mermaid.js

- Designed application workflows, system diagrams, and REST APIs, and developed secure **Express.js backend services** with Swagger/OpenAPI documentation.
- Built the **React Native mobile application** using Expo and TypeScript, with EAS for build and deployment automation.
- Implemented **Firebase Cloud Messaging (FCM v1)** for transactional push notifications and integrated notification workflows across the platform.

EDUCATION

Graduate Diploma in Software Engineering (GDSE)

Institute of Software Engineering (IJSE)

2024 – 2026

- Developed 5+ enterprise-level projects emphasizing clean code architecture and system scalability.
- Hands-on full-stack development applying modern software patterns to improve code maintainability.
